PROFESSIONAL SUMMARY

Third-year Computer Science undergraduate with a strong foundation in software development, Data Structures and Algorithms, and problem-solving. Passionate about building scalable, real-world applications and leveraging modern technologies to solve practical problems. A collaborative and adaptable learner with hands-on experience through impactful projects, committed to writing efficient, maintainable, and user-focused software.

EDUCATION

Chitkara University | Baddi

2024 - 2028

Bachelor of Engineering in CSE

CGPA : 9.03

Studying Computer Science with a focus on software development, data structures & algorithms, and full-stack web development.

PROJECTS

PostPilot — AI-Powered Social Media Automation Platform

React.js | **Node.js** | **Express.js** | **MongoDB** | **Redis** | **OAuth 2.0**

- Developed a SaaS platform for creating, scheduling, and managing social media content through a centralized content calendar.
- Integrated OAuth-based social account connections and Redis-backed background jobs for reliable scheduled content publishing.
- Added AI-powered caption, hashtag, and post variation generation to streamline content creation and platform-specific workflows.
- Built analytics dashboards and RESTful APIs with authentication, validation, and secure third-party social media integrations.

RankForge AI — AI-Powered SEO Intelligence & Rank Tracking Platform

React.js | **Spring Boot** | **PostgreSQL** | **Redis** | **AI/LLM APIs**

- Built a full-stack SEO intelligence platform that crawls websites to identify technical and on-page SEO issues, including metadata, broken links, and indexing problems.
- Developed automated SEO audits, keyword rank tracking, and historical analytics dashboards to monitor search performance over time.
- Integrated AI/LLM APIs to generate actionable SEO recommendations, content optimization suggestions, and metadata improvements from audit results.
- Designed RESTful APIs with **Spring Boot**, **PostgreSQL**, and **Redis** caching, with scheduled background jobs for recurring crawls and report generation.

SKILLS

Programming Languages : C, C++, JavaScript, SQL

Frameworks & Libraries : React, Node.js, FastAPI

Tools & Platforms : Git, GitLab, Linux

Databases : MySQL, MongoDB

Soft Skills : Communication, Adaptability

Languages : English, Hindi
